DETAILED ACTION

Allowable Subject Matter

1. Claims 6-15, 17-23 and 25 are allowed.
2. The following is an examiner's statement of reasons for allowance: Although the prior art, such as Sauron et al. (US Publication 2002/0125216 which is closest prior art discovered) discloses a method of repairing a rail which includes a head, upright web and base section, the method comprising the steps of identifying the defect, filling the void with molten metal which bonds at the void-rail interface by arc welding (see paragraphs [0017 and 0052]), the prior art as a whole fails to obviate the use of an electrode in such a process where said molten metal is formed from a material resulting in a weld deposit having a carbon concentration of about 0.2% to 1.0% by weight, wherein the high carbon welding electrode produces a weld deposit from, by weight, about 0.2% to about 1.0% carbon, from about 1.8% to about 2.0% manganese, from about 0.5% to about 0.6% nickel and from about 0.5% to about 0.95% silicon. The electrode used by Sauron et al. (LINCORE 33) is a low carbon electrode (much lower than 0.2 weight percent) without nickel, and the use of a high carbon electrode with the claimed ranges of nickel, manganese and silicon for use in any welding operation which would obviate the claimed process is not found in the prior art of record.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
